LABORATORY PRODUCT PORTFOLIO

ABOUT FAIRY DENTAL LAB

Crafted with care. Made to collaborate.

Fairy Dental Lab provides dental laboratory solutions for overseas clinics and laboratories, combining digital design with hands-on technical craftsmanship.

Our Shenzhen manufacturing team brings production experience dating back to 2015. The portfolio spans fixed restorations, implant prosthetics, removable dentures and orthodontic appliances.

Digital capability

3Shape and exocad design with CAD/CAM production support.

Case coordination

Prescription review, shade communication and production follow-up.

01 / ESTHETIC RESTORATIONS

Veneers & press ceramics.

Restorations developed around your prescription, shade selection and case requirements.

Veneers

Anterior ceramic restorations with individualized shape and shade.

IPS e.max

Press ceramic options for crowns, veneers and partial restorations.

02 / CROWN AND BRIDGE

Zirconia, case by case.

Monolithic and layered options for a range of crown and bridge prescriptions.

Monolithic zirconia

Full-contour restorations with shade and contour tailored to the case.

Layered zirconia

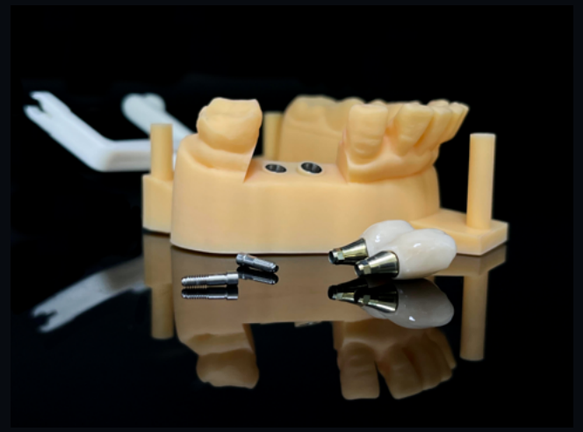

Ceramic layering for case-specific esthetic characterization.

03 / IMPLANT SOLUTIONS

From abutment to full arch.

Full-arch hybrid restorations

Custom restorative design with a case-specific prosthetic plan.

Titanium bars

CAD/CAM support structures for implant restorative cases.

Custom abutments

Individualized components; confirm implant system and platform with each order.

04 / CROWN AND BRIDGE

Established materials. Individual detail.

PFM, full-cast metal and provisional restorations to support your clinical and laboratory workflow.

PFM restorations

Porcelain-fused-to-metal crowns and bridges with alloy options confirmed per case.

Full-cast restorations

Metal crowns and related restorative components.

Also available: PMMA temporaries and diagnostic wax-ups.

05 / REMOVABLE SOLUTIONS

A complete range of removable work.

Acrylic, flexible and framework-based options, including staged try-in and finishing.

Acrylic dentures

Full and partial dentures with tooth arrangement and shade instructions.

Flexible dentures

Flexible partial designs with case-specific retention and finishing.

06 / FRAMEWORKS

Frameworks with a considered design.

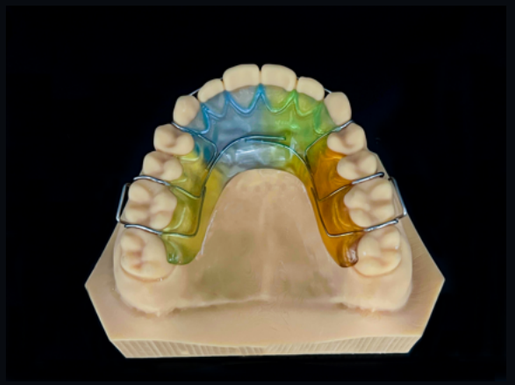

Cast metal and PEEK framework options. Confirm design, material and rest positions with your prescription.

07 / ORTHODONTICS

Appliances for your prescription.

Clear retainers, Hawley retainers, night guards and other prescribed appliances. Please specify the arch, material and design.

08 / PARTIAL RESTORATIONS

Inlays & onlays.

Ceramic partial restorations made to the supplied preparation and prescription.

WORKING TOGETHER

A clear path from file to finish.

01 Submit

Send scans or impressions, the Rx form, tooth numbers and shade details.

02 Confirm

Review case requirements, quotation and production schedule with us.

03 Produce

Design, manufacture and check the restoration against the prescription.

04 Dispatch

Pack the case, prepare the invoice and provide shipment tracking.

START A CONVERSATION

Let us plan your first case.

Tell us your product requirements and share a sample prescription or digital case for review.

MANUFACTURING ADDRESS

5F, Block 1, Lebao Industrial Park, Fengxin Road, Cuihu Community, Guangming District, Shenzhen, Guangdong, China 518107

Production planning

Crowns & bridges

3-4 working days

Implant cases

4-6 working days

Removable cases

3-5 working days, depending on the case

Production times begin after case acceptance and confirmation of required information. Transit time is additional; confirm the schedule for complex or urgent work.

Quality and aftercare

Cases are reviewed against the prescription before dispatch. Production-related issues can be assessed for a free remake; contact us with case details and supporting photos.

Digital scans and physical impressions accepted. Model printing, shipping and payment terms are confirmed with your quotation.
